

QUALITY AT THE SPEED OF LIGHT

SILICURE™

SILICURE is a unique, crystal clear, silicone-based formulation that provides lasting protection and is so transparent, lamps and bulbs appear uncoated. If a lamp or bulb is dropped or broken, virtually all the glass is contained within a soft but firm encasement. SILICURE is typically used for coating Compact Fluorescent, Halogen and Incandescent lamps or bulbs, including A-shape, Reflector Flood, Decorative and PAR Incandescent.

IN COMPLIANCE WITH ALL GOVERNMENTAL REGULATIONS

Advanced Lamp Coatings is in compliance with all FDA, USDA, and OSHA requirements. Use of our products will help you meet the regulations for all critical safety applications:

- food processing • elevators • sports facilities • security lighting • parking garages
- retail • grocery • hotels • hospitals • warehouses • schools

ALL GLASS AND INTERNAL ELEMENTS ARE HELD INTACT WITHIN OUR TOUGH AND CLEAR SHATTER CONTAINMENT COATINGS.

Our lighting professionals triple check every lamp and bulb to ensure coverage integrity, zero defects and crystal clear clarity. The results are quality and reliability unsurpassed in safety coated lighting. In addition, our lamps and bulbs are guaranteed for the rated life of the lamp or bulb.
